Braided Cable:	1.5m tangle-resistant cable with dual USB-A and USB-C connectors
Dual Connector:	USB-A and USB-C on a single Y-cable for universal compatibility

PRODUCT OVERVIEW

GETTING STARTED

The Astrum **HU200C** features a dual-connector design, allowing you to connect to a wide range of devices.

1. Locate the **USB-A** connector and the **USB-C** connector at the end of the cable.
2. Choose the appropriate connector for your device:
   Use **USB-A** for traditional desktop PCs, laptops, gaming consoles, and USB-A hubs.
   Use **USB-C** for modern laptops, tablets, smartphones, and USB-C enabled devices.
3. Plug the selected connector firmly into the USB port of your device.
4. The headset is Plug and Play. No additional drivers or software installation is required. Your device will automatically recognize the headset as the default audio input and output device (you may need to manually select it in your system settings).

Important Note: These headphones use the modern USB-C Digital Audio standard. While compatible with most new devices, please ensure your device supports USB-C digital audio output.

IN-LINE REMOTE CONTROLS

The in-line remote puts full control at your fingertips. It features a Multi-Function Button **(MFB)**

MUSIC PLAYBACK CONTROLS

Function	Action	Operation
	Play or pause the current track.	Single Click the Multi-Function Button.
	Skip to the next song.	Double Click the Multi-Function Button.
	Go back to the previous song.	Triple Click the Multi-Function Button.

CALL MANAGEMENT CONTROLS

Function	Action	Operation
	Pick up an incoming call.	Single Click the Multi-Function Button.
	End an active call.	Single Click the Multi-Function Button.
	Decline an incoming call.	Press and hold the Multi-Function Button for 2 seconds.

VOICE ASSISTANT ACTIVATION

Function	Action	Operation
	Launch Siri, Google Assistant, or Cortana.	Press and hold the Multi-Function Button for 3 seconds, then release.

MICROPHONE MUTE

To mute/unmute the microphone during a call, use the mute function on your software application (e.g., Zoom, Teams). This headset does not feature a dedicated hardware mute switch on the remote.

TROUBLESHOOTING

Issue	Possible Cause	Solution
No sound / Headset not detected	Loose connection or incorrect USB port. Device not set to USB audio output.	Ensure the connector is fully inserted. Try a different USB port. Restart your device. Go to your device's sound settings and select "Astrum HU200C" or "USB Audio" as the default output device.
Microphone not working	Device not set to USB audio input. Application permissions.	Go to your device's sound settings and select "Astrum HU200C" or "USB Audio" as the default input device. Ensure your application (Zoom, Teams, Discord) has permission to access the microphone.
Sound is too quiet or distorted	Low volume setting.	Increase the volume using your device's system volume.
Sound is too quiet or distorted	Audio enhancement settings.	Disable any audio enhancements or spatial sound effects in your device's sound settings.
Remote buttons not responding	Driver conflict.	Unplug the headset, restart your device, and plug it back in.
Voice Assistant not activating	Device notsupported or not set up.	Ensure your device supports voice assistants. Check that the voice assistant app is installed and configured.
